JET WORKS AIR CENTER Celebrates New Hangar Completion

Denton, Texas – June 2009 -- Jet Works Air Center recently celebrated the completion of their new 43,000 square foot hangar in Denton, Texas (KDTO). Many local aviation community professionals joined the Jet Works Air Center staff at the open house on June 9th including the North Texas Business Aviation Association (NTBAA).

The new hangar includes 40,000 square feet for additional aircraft maintenance, repair, inspections, and avionics installations. Similar to the existing Jet Works facility, the new hangar will also accommodate long range business jets including Bombardier Global Express and Gulfstream GV models. The remaining 3000 square feet will provide additional offices and back shop space.

“We saw this as a great opportunity to expand our business even though our industry may be struggling,” commented Trey Bryson, President of Jet Works Air Center. “Being able to provide heavy maintenance, paint, interior and full avionics services all together in one place, in a timely manner, is very attractive to many operators. This new hangar will allow us to provide more customers with quality workmanship with a personal touch and we look forward to doing just that.” added Bryson.

Jet Works Air Center has continued to grow their full service operation since moving to Denton from Ft. Worth in 2005. As the exclusive completions center for Piaggio Avanti II in the United States, the experienced Jet Works’ staff provides superior quality paint and interior services and is accomplished in refurbishments for a wide range of turbine powered aircraft.

Jet Works Air Center also provides extensive avionics services and is an authorized dealer for Rockwell Collins, Honeywell - Bendix King, Universal Avionics, Goodrich, Garmin, L-3, Aircell, Airshow and various other manufacturers. Highly qualified Jet Works avionics technicians perform extensive avionics installations, modifications, certifications and warranty repair on all the latest avionics equipment from major manufacturers.

About Jet Works Air Center:

Headquartered in Denton, Texas, Jet Works Air Center has an extraordinary 66,000 square foot facility with an additional 43,000 square foot expansion that recently opened. They specialize in heavy airframe maintenance, inspections, complete avionics installation and warranty service, interior modifications, completions and paint for a wide range of turbine powered aircraft. The complete line up of services are provided in one central location making it easy for Jet Works' customers to get in, get out, and get back to flying their aircraft.
